

VIRTUAL MYSHOP TRAINING PRIVATE SESSION WITH ONLY YOUR STAFF

We are pleased to now be offering online virtual MyShops for all of our ACDelco Professional Service Centres! This format is interactive and informative as only one shop will be presented to at a time. Just like our MyShop program, these sessions are one hour per course and will take place at your shop, all you need is a computer, cell phone and a decent internet connection! After you schedule the course, our professional instructors will take you through a presentation that includes operation and diagnoses principles and of course, answer any questions you may have.

Starting and Charging System Diagnosis and Repair ***(Feb.15-19, 2021)***

This 1-hour virtual MyShop course covers the way to diagnose and repair starting and charging systems. Emphasis will be placed on Stop / Start technologies, Two-battery system, DC-to-DC system and Ultra Capacitor systems. Current diagnostic procedures discovering the root cause of starting and charging system failures and proper service procedures.

A/C Compressor Replacement ***(Mar.22-26, 2021)***

This 1-hour virtual MyShop will cover important tips and procedures for replacing A/C compressors to ensure long service life. The operation of the refrigerant cycle, the components involved and the role of the A/C compressor will be covered. Also discussed will be causes of compressor failure and the use of this information when determining the course of action for compressor replacement. This virtual MyShop will help familiarize yourself with locating and using the service information required for proper A/C compressor replacement.
